Marat Safin -- Gala -- Lightroom and ACR Preset Package: I have been doing photography since 2006. Since That Time, my photographic gear has shifted several times: Out of Sony\'s soap dish into Nikon digital SLRs; photograph processing changed in Colour, in saturation, by comparison, intoning; the shooting process itself Was altering: a vision of light, colours, intra-camera settings. And when I had been Asked now to process new photographs, by way of instance, as I did in 2013, 2014: Contrasting, impartial, not soaked, gloomy, and then I wouldn\'t have the capacity to perform this. Instead, I\'d have succeeded in replicating the processing, however, I Don \'t need to replicate it since preferences have shifted. Today (when I\'ve more Spare time) I chose to delve into older writings of my photographs and found that a lot of Raw documents together with processing parameters applied to them in ACR (Lightroom). This Inspired me to assemble that the "Gala" preset Pack... I have not ever enjoyed (and don\'t like today ) to process photos, and So I sit at the editor over one film for around a minute. And I Frequently write presets for me personally, since this speeds up processing much more.

"Gala" is a set of 17 Presets to get Lightroom (including mobile) and ACR (Adobe Camera Raw), listed By me (old and new) from photos in 2011 to 2020.
