Natural sounds and recorded noises that are commonplace are incorporated into the background music. This artist uses TASCAM recording equipment to gather endless sound information from water, trees, factories, animals, and even the sounds of cities.

When those tracks are imported into Ableton Live, he creates the beat and resamples it to create a new track. Also, he uses synthesizers like Moog MATRIARCH and the KORG Minilogue.

MIFFRINO puts his audio field data into the sampler within Ableton Live to make a new sound he can play on his synthesizer. There isn't a single other sound quite like those. They're distinctive and unique, professionally edited, recorded, and processed.

Included Package:

- BPM 112 - 128
- 7 Bass Loops
- 21 Beat Loops
- 14 Glitch Loops

What is Tsunami Track Sounds Glitch IDM by Miffrino (WAV)?

MIFFRINO is a sound artist and producer who creates unique and distinctive audio content, blending various musical techniques and incorporating field recordings into their work. Here's a summary of key points from the description:

- **Genre and Style:** MIFFRINO's sample pack is described as being inspired by a variety of musical genres, including Electronica, Techno, Chill Out, Glitch, and IDM (Intelligent Dance Music). This suggests that the pack offers diverse sounds suitable for electronic music production.
- **Field Recording:** MIFFRINO is known for using field recording techniques, capturing natural sounds and everyday noises from various environments such as water, trees, factories, animals, and urban settings.
- **Equipment:** MIFFRINO uses TASCAM recording equipment for gathering sound data. Additionally, they use synthesizers like the Moog MATRIARCH and the KORG Minilogue.
- **Sound Manipulation:** After gathering field recordings and creating beats in Ableton Live, MIFFRINO resamples the tracks to generate new and unique sounds. They also use Ableton Live's sampler to further manipulate and integrate these sounds into their compositions.
- **Unique and Professional:** MIFFRINO's approach results in professionally edited, recorded, and processed sound samples that are distinctive and unique. These samples can be used by other musicians, producers, and artists to add a unique flavor to their music productions.
