Blender - Lighter Addon v2.0.4: Introducing Lighter – the ultimate solution for effortless lighting setups, designed especially for those, like myself, who struggle with lighting intricacies. This innovative addon streamlines the process by employing a brute-force approach, rapidly cycling through thousands of setups within seconds to deliver the perfect illumination for your models.

- Presets System: Access a variety of pre-defined lighting setups to suit your scene's mood and tone.
- Translation on Local Space: Easily maneuver and adjust the lighting setup relative to your model's position.
- Plug and Play Gobos: Seamlessly integrate gobos into your lighting arrangement for added depth and texture.

Lighter offers a simple and enjoyable method to illuminate your scenes effectively.

How to Use:

- Select the object requiring illumination within your scene.
- Activate "Light it up!" within the addon panel.
- Utilize the array of parameters to fine-tune the lighting setup according to your preferences.
- Enjoy the freedom to reposition the lighter object effortlessly, enabling precise placement of lights anywhere in your scene.

Experience the convenience and creativity of Lighter as you effortlessly transform your scenes with stunning lighting setups.
