iMessages Text Pack (VH 54327537) - AE Project:

The iMessages Text Pack is an After Effects template perfect for crafting realistic text message animations.

It has various message types, including text, location, file, and photo collection messages, along with three different versions and image placeholders. Designed for After Effects CC, this template supports self-resizing text messages in a 16:9 Full HD format and requires no additional plugins. Editing is fast and easy using the control panel, and the template.

Package information

Published on 13 September 2024, this After Effects project, compatible with CC, includes all necessary After Effects project files.
