

## Embarcadero RAD Studio Delphi 12.2 Athens Update 2 v29.0.53982.0329 + Lite 18.4 + CRACK & Patcher

2024-12-29 08:44:28   label 我要反馈   下载页面

**Embarcadero RAD Studio 12 Athens** introduces powerful features aimed at streamlining and accelerating app development across multiple platforms. With support for Windows, Android, iOS, macOS, and Linux, developers can leverage a single codebase to build applications up to five times faster. Key enhancements include Delphi language additions like multiline string literals and Skia graphics support in FireMonkey, bolstering performance and quality.

Integrating Visual Assist into the C++Builder IDE enhances productivity with top-tier code completion, navigation, and refactoring capabilities. Additionally, the preview of a new Clang-based C++ compiler supports the latest standards and facilitates seamless integration with external libraries and C++ codebases. also provides official support for the latest platform versions, ensuring developers can easily target the most up-to-date environments.

Improvements in UI design, high-DPI support, and compatibility with Windows 11 further enhance the development experience. Cross-platform deployment capabilities enable compilation for macOS (including M-series Apple Silicon) and deployment with universal packages for App Store submission. Enhanced remote collaboration tools, biometric authentication support, and embedded InterBase Dev Edition round out **Embarcadero RAD Studio 12 Athens's** offerings, empowering developers to create high-quality, multi-platform applications efficiently and effectively.

### Key Features of Embarcadero RAD Studio 12 Athens :

1. Delphi language additions including multiline string literals and Skia graphics support in FireMonkey for enhanced performance and quality.
2. Visual Assist integration in the C++Builder IDE for improved productivity with advanced code completion, navigation, and refactoring capabilities.
3. Preview of a new Clang-based C++ compiler supporting the latest standards and offering better integration with
