NFT Art Promo Scenes (Videohive 36117310) - AE Project

2025-02-10 17:01:12　　label 我要反馈　　下载页面

NFT Art Promo Scenes - AE Project VH-36117310: The program allows you to create 4 scenes using NFT images. The project includes two zoom camera images and two loops that rotate. There are three metal card materials, and two backgrounds available. The possibility of rendering is using an alpha channel. It is possible to alter the size of the metal card both in width and height. It's simple to control the template by following the tutorial video. The custom control layer is extremely beneficial for setting colors. You can render each scene singly: loop1,loop2,zoom1,zoom2, or like one ready dynamic set.

- 4 SCENES
- 3 MATERIALS
- 2 Backgrounds
- LOOPABLE 2.
- ALPHA CHANNEL
- 3840x2160 pixels
- Card size can be changed
- Custom control layer
- Clear Video Tutorial
- AE CS6 or higher
- No plugins are required
- The music isn't included
