

Aescripts Flatten Layers 2 v2.2 (WIN, MAC)

2025-02-10 16:40:47 [label](#) [我要反馈](#) [下载页面](#)

Flatten and group layers with no pre-rendering! The layers you select will be flattened to form a single layer on the background, without rendering or quality degradation. It is easy to switch between the layer that has been flattened as well as the unflattened one.

It's time to smooth layers!

- Simply select the layers
- Choose the frame rate and the quality.
- Select the button to create

The layers that are selected are flattened into one layer that is an unrestricted PNG sequence. It is built within the background.

You can continue to work while the layers flatten in the background.

You can easily switch between the flattened and original layers. You can easily toggle between the original and flattened.

New Features:

- The ability to custom choose your Temp folder.
- The ability to show created PNG sequences folder in the explorer.
- The ability to change the path of the created PNG sequences folder.
- Apply a similar random color to flattened layers.
- Ctrl+Z fixed.
- Some other errors fixed.
