Gamut – Panasonic Conversion LUTs for V-Log:

The custom **Panasonic V-Log Conversion LUT** offers superior highlight retention, balanced saturation, and accurate color reproduction across various lighting environments, making it an ideal choice for filmmakers. It ensures clean skin tones without excessive red hues, provides pleasing highlight roll-off, and maintains dynamic range, even in challenging conditions like nightclubs or intense lighting. Unlike Panasonic's official LUTs, which often produce inconsistent results, this LUT is designed for reliable performance across different skin tones and environments, making grading easier and more effective.
