What's this course all about?

Begin by introducing yourself to Cubase 9.5. Through this course, you'll learn one of the most useful tools to work in the field of sound design as well in a step-by-step study of the process of making every element in sound effect. We'll focus on the specialized aspect of sound design, which is working with animated videos. It doesn't matter if it's an explainer video that tells about a brand and its products, or an essay in visual form (an author's declaration on a specific subject) The approach we'll cover in the course is equally well in creating an audio design in any area in visual media.
