Unreal engine - EIN Pro Deadler v5.3

2025-02-10 16:58:11 label 我要反馈 下载页面

Unreal engine - EIN Pro Deadler v5.3: Experience a diverse range of dying animations and damage reactions with this comprehensive animation pack tailored for game development. Perfect for fantasy RPG games, as well as casual and fun concepts, this asset pack offers a variety of animations to bring your characters to life.

Containing 52 unique animations, including various dying animations and multiple hit animations, this pack covers a broad spectrum of character reactions. From Dead and Hit animations to Knockback and Knockdown sequences, each animation is meticulously crafted to enhance the immersion of your game world.

Whether your character succumbs to cold, flame, poison, or electric shock, this pack provides death animations tailored to different properties. Additionally, directional knockback and knockdown animations add depth to character interactions, ensuring dynamic gameplay experiences.

Rigged to the Epic skeleton, these animations seamlessly integrate with existing character models, allowing for easy implementation into Unreal Engine projects. Whether you're developing on Windows or Mac platforms, this animation pack is compatible with both, offering flexibility and convenience for developers.
