A Beginners Guide to Generative AI: This Beginner's Guide on Generative AI is an excellent start for newbies or those who want to explore the possibilities in the field of generative AI.

Generative Artificial Intelligence (AI) is one of the cutting-edge applications derived from Images, Music, Popular voice-overs that include Donald Trump, and Video. Many people are familiar with CHATGPT4, which is focused on delivering text-based replies to users. The beginner's course covers platforms like Adobe Firefly (Beta), Midjourney, Adobe Photoshop Beta Ai generative fill, and Dalle to help you understand the basics and knowledge about this field. Adobe Firefly also provides additional applications such as Text Effects and Vector colors, and creatives will receive the first chance to experience these beta programs.

We will also show you how to start with AI to transform your favorite songs into famous AI voices such as Joe Biden, Donald Trump, Drake & more using Voicify. We'll also help you create beats on your social media profiles using the Soundful platform.

In the final part, we'll briefly introduce the application for text-to-video of Synthesia, which allows you to create videos that feature AI avatars that can be translated into multiple languages.
