Tools   Applications
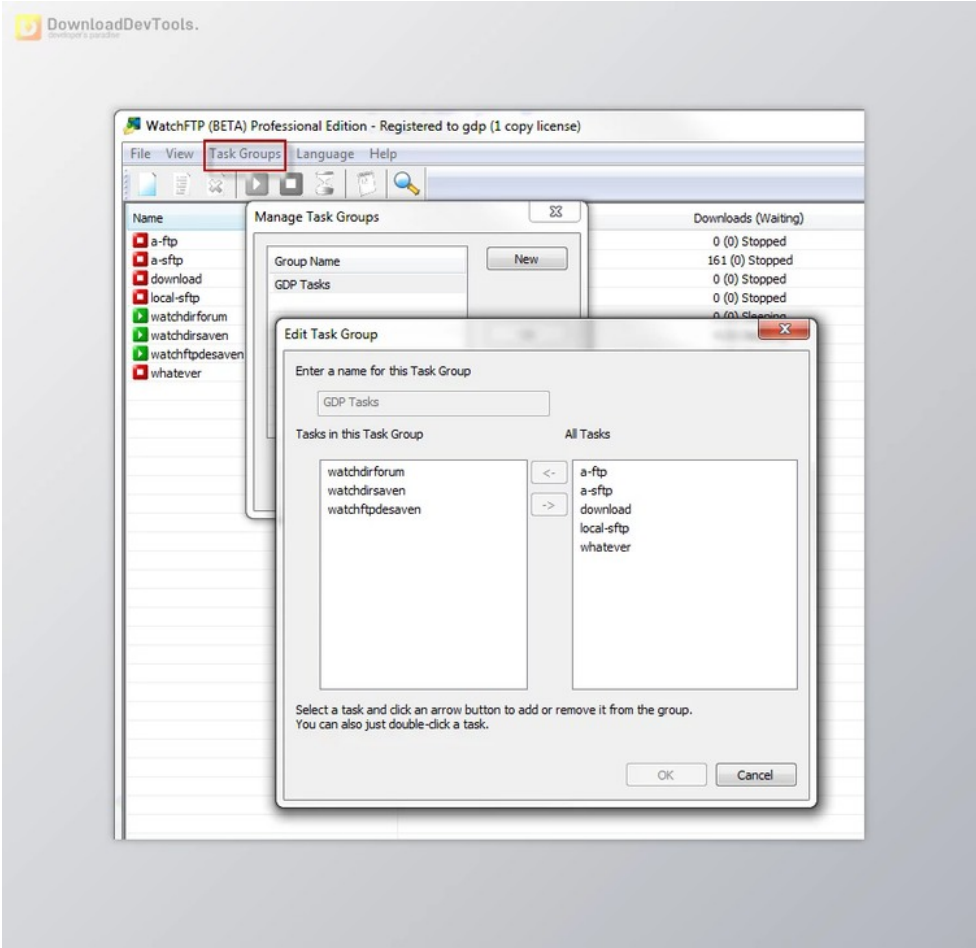

is a user-friendly Windows program designed to automatically monitor FTP sites for new or updated files and download them directly to your computer. It runs quietly in the background as a Windows Service, working 24/7 without needing constant supervision. Whether managing a single FTP site or multiple, **WatchFTP Pro** can handle it all, ensuring your files are downloaded securely and right when needed. For added convenience, the software can also send you email alerts whenever new files are downloaded, so you're always in the loop without checking manually.

In addition to downloading files, **WatchFTP Pro** offers several automation options to make your workflow even smoother. You can schedule download times to avoid periods of server downtime and run scripts automatically for each file, enabling seamless integration with your existing systems. The software can even clean up files from the FTP server after a successful download, keeping everything organized.

Key Features of **WatchFTP Pro**:

1. **Runs as a Windows Service:** Operates continuously in the background, requiring no manual intervention.

2. **Secure FTP Support (FTPS & SFTP):** Safeguards data transfers with encrypted connections.
3. **Email Notifications:** Automatically sends email updates listing downloaded files.
4. **Custom Script Execution:** Automatically run custom scripts or batch files after each download for enhanced integration.
5. **Flexible Scheduling:** Set specific download schedules to avoid server maintenance times.
6. **Monitor Multiple FTP Sites:** Supports multiple tasks with unique settings.
7. **Automatic File Cleanup:** Optionally deletes files from the server after download, keeping everything tidy.
