

Automated WEATHER Forecast – WORLD Weather (Videohive 49477134) - AE Project

2025-02-10 16:45:47 label 我要反馈 下载页面

**Automated WEATHER Forecast – WORLD Weather VH-49477134:** Introducing the sole Graphical Project/Template available online, empowering you to automate Weather Forecast Graphics within After Effects fully. Set up the forecast once and utilize the script daily to effortlessly update current and forecast weather data with just one click, saving valuable time on manual work.

The World Weather Forecast Graphics and Script package comprises a variety of elements, including:

- Realistic Earth Globe (No-Plugins Required) featuring customizable maps and seamless no-keyframe animation
- Forecast Graphics
- Weather Icons in realistic shapes, line variations, and more

Forecast Graphics can be customized manually with specific values or automatically with real-time data through the script. The AWF Script facilitates creating and continuously updating weather graphics for any city or location worldwide. Input a city name or latitude and longitude values to generate graphics for the current weather or a 5-day forecast with a 3-hour step. The script allows for daily updates of forecast data and graphics automatically.

Utilize the template to craft broadcast graphics, weather alerts, world forecast reports, and more using the globe maps. All graphics are fully editable, enabling seamless adaptation to existing designs or brand images. Icons are available in three versions, ready for customization or replacement with your own. The modular design caters to multi-purpose use across TV, web, social media, YouTube, apps, and beyond.

For the Full Version featuring flat weather maps, 240 individual world countries, vertical forecast tables, and additional features, explore the Automated WEATHER Forecast – Script and Template for After Effects.
