Color Study:Create Your Own Custom Signature Palette: Hello! I'm Cynthia Harrison. I'm an experienced artist and interior designer. I'll share my enjoyable and straightforward methods for studying the color spectrum and designing your color palette.

Are you having trouble with color combinations? Or are you looking to take your artwork and design skills to the higher step? You may be an artist, graphic designer su, face pattern designer, interior designer, decorator, or want to discover the possibilities of color. This course will provide stimulating exercises and materials to help you improve your capabilities with colors.

With demonstrations and real-world examples, I will demonstrate to you how to:

- The fundamentals of color theory
- Design your color palette using images you have using Procreate on your iPad.
- Create distinctive artwork to examine your color palette
- Print and exhibit your work to show your color palette.

This course is appropriate for all levels, and previous understanding of Procreate is beneficial but unnecessary. You can study your color palettes using your design or download the templates I designed for you using Procreate's materials area.

You only need an iPad Pro with Procreate, an Apple Pencil, and your imagination!
