Aescripts Rename It v1.0.2:

Rename It is a tool for Adobe Premiere Pro CC2020 and higher that simplifies renaming, searching, and sorting items within the Project Window and Timeline.
In the Project Window, users can search for and rename items based on type (e.g., Video, Sequence), and apply functions like renaming or sorting only to selected items. The tool also allows adding prefixes, suffixes, and timestamps to item names, or reverting names to their original file names. In the Timeline, users can search and rename clips in the active sequence. It also offers color labeling and bin organization for enhanced project management. "Rename It" requires Adobe's "New World" setting to be enabled.
