Tropic Colour OPPENHEIMER LOOKS: Unleash the Cinematic Power of Oppenheimer with Our Exclusive LUT Collection!

Partnering with our team's senior colorist, we proudly present a meticulously crafted collection of looks inspired by Christopher Nolan's Oppenheimer (2023). These LUTs have undergone extensive testing across various footage types, cameras, and color profiles to ensure versatility and optimal performance.

How to change the contrast and light of movies in Lut?

You can use "Tropic Color OPPENHEIMER LOOKS" to change.

Where can I download the product?

After subscription, You can download it for free from here.

Inspired by Key Frames: Our senior colorist painstakingly reconstructed and battle-tested these LUTs (.cubes) based on critical frames from Oppenheimer. The result is a set of LUTs that authentically capture the cinematic essence of this groundbreaking film.

Rebuilt Film Colors: Oppenheimer utilized three distinct film stocks (Vision3 250D, Vision3 500T, Double-X5222). Each look in our pack is meticulously modeled after these three film stocks' colors and contrast characteristics, ensuring an authentic representation of Oppenheimer's visual identity.

3 Looks / 5 Variations: Immerse your footage in the cinematic brilliance of Oppenheimer with our three distinct looks, each accompanied by five variations. Whether you seek the subtle nuances of 250D, the richness of 500T, or the timeless appeal of Double-X5222, our collection offers diverse options to elevate your visuals.

Versatile Application: This pack provides two convenient ways to apply the LUTs to your footage. The LOG to LOOK version instantly transforms your LOG, RAW, or FLAT footage into the desired look. Alternatively, the CONVERSION to LOOK option can be applied post a 709 conversion LUT, offering flexibility in your post-production workflow.

Elevate your filmmaking with Oppenheimer's cinematic charm. With our carefully crafted LUT collection, you can effortlessly infuse your projects with the visual allure of this iconic film. Explore the possibilities and bring Oppenheimer's cinematic magic to your creations!
