

Blender Market – Paved Path Generator v1.3

2025-02-10 16:58:11 [label](#) [我要反馈](#) [下载页面](#)

Blender Market – Paved Path Generator v1.3: Paved Path Generator contains 15-20 paved paths available for Blender, which can be altered by tweaking parameters within the Modifiers tab.

Starting with one of the models used as a base model, utilize the geometry nodes parameter to customize the aspect of the path...

After that, alter the curvature object to change the trail to match your preferred trail.

Paved Path Generator is a collection of 20 different types of paved paths for Blender that can be customized by simply tweaking parameters inside the modifiers tab.

Starting from one of the base models, use the geometry nodes parameters and edit the curve object to personalize the path aspect according to your needs.

How to append a path (Classic01)

- File > Append >
- go to the folder where you downloaded the file named
- Paved_Path_Generator1.3.blend and select it
- Paved_Path_Generator1.3 > Collection
- select the desired collection (all selectable paths are
- written in CAPITAL LETTERS)
- CLASSIC01 PATH > Append

Now you have the CLASSIC01 path in your 3d viewport with some instance objects (tiles, ground, and grass). Don't worry about instance objects; they are only for creating paths automatically. Select the CLASSIC01 object, and in the modifier properties tab, you'll find the parameters that allow you to personalize your path.

You can pick the amount of damaged or old tiles, the alignment of tiles and how much grass... and many other fascinating options.

With this latest version, you can also include the border, which allows you to create an avenue.

The Blender Version 3.0 or higher is required.

Models can have as high as 2k textures. They are of actual size and ready to render using Cycles or EEVEE.

Paved Path Generator 1.3

Updated Version

- I added a border element to every template and a border element to each.
- Some textures have been improved.
- The grass material has been improved.
