### Gfx plugin details of Drone LUT Pack

The product is in **LUTS category** , for more information about this post you can click on the home page link in the sidebar.

### Indoors You will discover the next LUTs:

- 1 - Ambition
- 2 - Executor
- 3 - Apollo
- 4 - Boom
- 5 - Freedom
- 6 - Aurora
- 7 - Flash
- 8 - Focused
- 9 - Vesper
- 10 - Slayer
- 11 - Firefly
- 12 - Blackout

Each camera Differs And needs an exceptional set of LUTs to get the best results while color grading. I have spent a Couple of period dialing in a Variety of appearances for the DJI color science. From punchy daring, natural and tonal appearances -- those LUTs are designed For many distinct situations.

Like my Sony LUT package, I have Arranged all of the LUTs based on their own style. Beginning with natural, stylized, And eventually tonal.

Compatible drones comprise: Mavic 2 Guru & Zoom / Mavic Mini / Spark / Mavic Pro First / Phantom 4 Professional & Advanced / / Phantom 4 First / Mavic Air 1 & 2 / Inspire 1 & 2 2.

I recommend you utilize these LUTs having an adjustment layer which sits over all of your clips, so you can tweak The first clips beneath. First use the LUT into the adjustment layer Correct the first clip's brightness, curves, and vulnerability until fulfilled With the appearance. Some clips Won't require any additional alterations, it'll all Rely on how they have been taken.

In the package, you may Locate a PDF that includes my urge settings for a few of the very popular drones.

How Can I download the LUTs?

- Immediately after buying you Will get an email with a download link to the LUT package. This download link will last forever. Should You Ever lose the email, send a message to us with The contact form and we send you a fresh connection.

What is Drone LUT Pack

A Drone LUT Pack is a collection of Look-Up Tables (LUTs) designed specifically for drone footage. LUTs are color-grading presets that are applied to videos or images to achieve a certain visual style or mood. Drone LUT Packs are created to enhance and correct the colors, contrast, and overall look of footage captured by drones.

Drones often capture footage with unique color characteristics due to factors like lighting conditions, camera sensors, and the aerial perspective. Drone LUT Packs include a range of LUTs that can be applied to drone footage to achieve various cinematic looks, correct color imbalances, and match different shots within a project.

These packs are popular among videographers, filmmakers, and content creators who use drone footage in their work. By using LUTs from a Drone LUT Pack, they can quickly and effectively color grade their aerial shots to create visually appealing and consistent results.
