Double Color Exposure Photo Effect (CreativeMarket-5397406): There simply can't be enough of color experiments 'cause every time that the result can prove to be extremely unique. Give your images a new life with colors you'll layout by employing this Double Exposure Effect.

We have experimented with palettes, overlays, gradients, and makeup to supply the formula for the best double exposure effect you can achieve. There are two colors presets to switch between (blue/yellow; red/cyan) but don't be afraid to set different transparency and other parameters to carry out the result you'll admire. An additional sound effect alternative is a nice bonus for those, who love it even more vintage way. Explore the new sides of the fantastic old illustrations and photographs!
