Learning Revit 2024 With Paul F. Aubin: Autodesk Revit is currently one of the most sought-after BIM (BIM) tools. In this class, architect Consultant and Author Paul F. Aubin covers the distinctions between the different versions of Revit and teaches engineers and architects unfamiliar with the software how to utilize Revit to the fullest extent possible. Learn how to start an open, collaborative project with a team and select a template. Establish the basic grids, levels, and dimensions. You can then add doors, walls, and windows to your design. Learn how to create plans and documents conveying your ideas, import data from other CAD programs, and generate construction documents. Learn how to make a 3D cloud render.

Contents:

- Introduction
- Getting Started
- Building a Model
- Working with Views
- Creating Documentation
- Collaboration with Other People
- Creating Output
- Conclusion
