Plugins Nobe Display/False Color/Nobe Color Remap:

Nobe Color Remap is a powerful tool designed to simplify the post-production process while ensuring high-quality results.

It offers streamlined performance, enabling users to achieve perfect color precision with 32-bit floating point accuracy.

The tool integrates seamlessly with DaVinci Resolve, Premiere Pro CC, After Effects CC, Photoshop, and Final Cut Pro X, providing instant previews on an external monitor.

Key features include a user-friendly interface with modern tools, customizable grids for hue, saturation, and luminance adjustments, and built-in automation for saturation, contrast, and hue adjustments.
