SOUND EFFECTS

**Khron Studio Monster Library Vol 2:** The Monster Library Vol 2 comes as the second volume of the series of libraries. It's focused on giant monsters and includes 107 mono-compatible sounds. The 107 sounds are carefully selected so you can hear sound within any animation of your creature or monster, including death, footsteps, and sounds of receiving an attack or attacking... Every sound is provided with various variations to provide a more satisfying outcome. It is much more engrossing.

Everything you'll need about unique elemental sounds that you can use often and repeatedly to get them back.
Use the sound effects repeatedly for any of your productions or projects for as long as you want, without additional costs or royalty charges. Make use of your SFX for your games or in your trailer on your Kickstarter campaign, anywhere you're required to, in the amount you'd like to.

A wide variety of animals for your audiovisual projects, intuitive names for files, and total mono compatibility.

The game comes with 107 sound effects—many different noises for the monsters you have. We've tried to replicate specific characteristics of creatures, like breathing, death, various kinds of steps based on the materials used, food, etc.
