1.
2.

Blender Market - Procedural Traffic v2.0.1 offers a highly customizable, realistic, and efficient traffic simulation system that is easy to use even on low-performance computers.

How to design the car in an animated way using plugins?

You can use "Blender Market – Procedural Traffic" to design your project.

The add-on includes 400 detailed cars, which can be animated in under 10 seconds, significantly saving time compared to manual animation. Performance is optimized to handle up to a million cars, with simulation nodes ensuring cars do not crash.

"Blender Market - Procedural Traffic" Samples:

The system features high-detail car models with monthly updates adding new cars, random color palettes, and realistic wear effects. Recent updates have enhanced performance, fixed bugs, and added new features. Future updates will include more interaction capabilities and support for various terrains, though currently, there are limitations such as no interaction between separate curves and flat curve constraints.
