DR – Super 8mm Home Film Emulation Power Grades: Its Super 8mm Old Home Film Emulation Power grade for Davinci Resolve is everything you require for an easy one-step process to achieve the Film Look. It is available in a variety of flavors.

How to change the contrast and halos of the node in Davnci resolve?

you can use DR – Super 8mm Home Film Emulation Power Grades.

Where can I download the product?

After subscription, You can download it for free from here.

Power Grades gives you total control over the effects, and you can alter each layer separately. It also includes LUTs; however, they do not contain such information and are restricted in Luma Hue and Saturation.

It's precisely adjudicated so that colors won't be lost, and you'll get stunning color tones. If you're using Log, apply a CST Node (Color Space Transform Node) to set the input gamma and color space. All you have to do is alter the Saturation and Contrast according to your preferences. This grade can be applied to any video, such as Rec709, Log, 10-bit, or even 8-bit. It's tuned to ensure that colors don't fall apart if the footage is taken by a quality camera, not an 8-bit drone or an old GoPro that records footage with little data and sub-color sampling; it's an excellent way to use it.

Gfx plugin details of Davinci Resolve – Super 8mm Home Film Emulation Power Grades

The product gives you total control over the effects, for more information about this post, you can click on the home page link in the sidebar.
To search for similar products to Davinci Resolve – Super 8mm Home Film Emulation Power Grades,

All you have to do is change the contrast and halos of the node to your preference, and you're good to go. You can also export it as a LUT in Davinci Resolve.

Drag and drop it on your node, giving your video Natural Film Colors, Halation, and Mood.

Although the LUT provides only a tiny amount of details (only its Hue, Luma, and Saturation), the Power grade has all the effects and provides the complete ability to control the adjustments nodes, including Halation Effects.

You can apply it to Footage, Rec709, or Log. All you need to do is change the contrast of the node according to your preferences, and then you're ready to go.

This is an excellent product for those looking for a straightforward approach to achieve this Film Emulation Technique without trouble.
