Archipelago Quest – Quest 18 – Arbor: Inspired by the lush natural history of England's historic woods, Arbor is a collection of hues that range from the soft, diffused light that filters through the canopy to rich greens and deep hues that fern leaves produce as well as contrasted patches of bluebells. The Arbor innovative profile adds richness and dimension to your photo and the warm nectar tone. Subject Pop employs an AI-driven subject detection system to selectively reduce the background's brightness, highlighting your image's central focal aspect. Then, you can dial in your editing using Tone Mask presets designed to overlay over the primary settings. Quest 18 Arbor includes three color presets, three tone masks, a pop tool for subject matter, and one profile with a creative twist.
