24 Duotone Style Mobile & Desktop Lightroom Presets:

Duotones have been around since the time there are cameras.

In contrast to their roles as background performers, duotones can also be great as the center of a photo. According to the infamous cliche"less is more. When you reduce the number of colors in a photograph by just two colors, the photo is instantly more appealing because it's unlike the pictures we usually look at.

The general consensus is that this style seems to work best when you want your photo to appear professional without appearing too trendy.

These 24 Duotone Style Lightroom presets are ideal for giving your photos an individual look in a matter of minutes. We also have the collection in eight categories like modern, gentleman urban, nature, and other categories.

These filters are ideal on book covers and posters in which the text isn't so important as a powerful image.

Simply click and bring your photos to life and the look you want.

This set comes with
