G-Presets – From the Daisies: From Daisy’s original preset collection that can transform your images from snapshots into stories.

Inspired by the memories, we desire to cherish; The presets are reminiscent of a love affair for everything simple and free: the peace of sunsets in the desert, driving with the windows shut and the beauty of the Western landscape, and first dates without a destination.

Instead of merely staying with the status quo, These presets are rooted in the conviction that the most beautiful things in life happen when they are unplanned imperfect, and picked up through instinct.
