CData Drivers for Raisers Edge NXT streamline data integration by enabling seamless connectivity with reporting tools, databases, and custom applications through standardized drivers. These drivers facilitate effortless integration of Raisers Edge NXT data with BI, reporting, analytics, ETL tools, and custom solutions, offering unparalleled query performance and comprehensive access to data and metadata.

For ETL, replication, and warehousing needs, these drivers extend support to favorite ETL tools, ensuring robust, reliable, and secure data movement. By connecting RDBMS or data warehouses with Raisers Edge NXT, **CData Drivers for Raisers Edge NXT** facilitate operational reporting, query offloading, performance enhancement, and support for data governance initiatives, including disaster recovery archiving.

With support for popular database protocols such as ODBC, JDBC, ADO.NET, and wire-protocol interfaces like SQL Server and MySQL, accessing and managing Raisers Edge NXT data becomes seamless across various database management applications. Additionally, facilitate integration with workflow and automation tools, offering straightforward access to Raisers Edge NXT data from popular applications like BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more.

This package includes the following components:
