

## Colored Smoke Photoshop Action By ScaryClown (ABR, TXT, ATN)

2025-02-10 17:01:12 label 我要反馈 下载页面

### THINGS TO CHECK AND REMEMBER

1. Your photograph is in RGB color mode
2. Your photograph is in 8bit color style
3. You're running the English version of Photoshop.
4. If you're having errors, consider minding your Photoshop preferences. To do this, hold down Alt, Ctrl, and Shift keys (Mac: Command, Option, Shift) while starting up Photoshop. A dialog box may appear asking in case you would like to delete the preferences/settings file.
5. Avoid using little resolution pictures. For the best results, use Photos involving 1500px - 3000px high/wide. The odds of this activity running into errors increase the lower you go under 1000px high/wide. Pictures with great color variation and comparison will function best.
6. Avoid cleaning onto mostly black spots on a photograph. The result isn't really prominent when employed to mainly dark areas of a photograph.
7. Bear in mind that adjusting your photo resolution will determine just how broad the components distribute. If you operate the activity at 72DPI, then the components will probably be rather close - if you operate it in 300DPI, the components will probably be spread much broader. Please consult with this video tutorial to get a demonstration of the.
8. In the event you encounter an 'Out of Memory' error during the activity, go to the menu 'Edit -- Purge -- All' then press play on the activity to keep it. This sometimes happens when you've got insufficient memory installed onto your own PC. Photoshop can chew up lots of memory!

### HOW TO INSTALL THE ACTION

1. Inside Photoshop, then go into the 'Window' menu and select 'Actions'. A window will appear to the ideal hand side.
2. Within the Actions window, then click the top right side icon to show the drop-down menu. From here choose 'Load Actions...'. Choose the activity which came with the download.
3. The action will appear in the activity panel.

### HOW TO USE THE ACTION

1. Open a photograph to function with
2. Leave the picture layer secured and place it as the 'Wallpaper'. To place your photograph as the Wallpaper, pick your photo layer and go to the menu 'Layer -- New -- Layer in Background. .'. Please consult with this movie tutorial if you want more assistance here.
3. Make a new layer over the background layer referred to as 'brush'. MUST be lowercase.
4. Together with the 'brush' coating chosen, brush on the regions of your photo you would like to use the result to.
5. Play button located in the base of the activity panel or perform
