- It is super simple to use

VERY EASY TO USE

1. Place an overlay on your photo
2. Set the layer mode to SCREEN, and the black color will disappear
3. Set the size and position of the effect correctly
4. You can play around with the layer transparency to achieve the best result
5. If necessary, use an eraser (or layer of mask and soft brush) to clean facial parts, for example.
6. If you want a stronger effect, you can use a Brightness/Contrast Mask
7. You can adjust the colors by using Hue/Saturation mask
8. Merge layers, and that's all! It's so simple.
