The photographer is a wedding and candid lover and is focused on the things that really happen during the wedding day, trying to tell captivating stories from the smallest of moments. In his work, there's nothing staged, there are no poses or pretensions and only pure, authentic, and genuine photographs. HOW to use CAFASTYLE

"The five presets that are included contained in this bundle are my favorite tools, that can be used for a variety of reasons and I'm sure that I can use them on every kind of photograph. They're great for all-day editing photos except for Blackberry. Blackberry was developed for extremely extreme instances where you want to bring out the gorgeous bright areas of your photograph, whether extremely high contrast or gradual changes in gray tones. Passion Fruit is a look that has warm and calming tones It has a soft feel and can be used in a variety of scenarios. Blueberry is a cold-tuned, textured preset that evokes the freshness of morning mist. It is strongly recommended to use it for engagement pictures where you're looking for a more cool color scheme. Pinecone is designed to emphasize the contrast in the colors between the bright and dark areas of the photograph. Pencil is a black and white-colored preset that highlights gray textures It's a classic look and reminiscent of old movies and also has a soft style."
