We primarily focused on the 100% original and valuable vocals, complete Acapella, vocal chops, and vocal FX. We included one-shots, shouts, and phrases to make the pack more comprehensive. This is the complete vocal one-stop shop.

The acapella's are divided into pre-chorus, verse, and chorus. These include dry as well as wet renditions. They also include all backing layers. They also contain the vocal FX. Vocal FX are atmos, whispering, gated, reverse singing, vocal effects like Vocoder, and many more, all composed of the vocals. So very unique sounding.

All cut and processed, ready to drop into your samplers or DAWs.

Note that this is a complete vocal pack. Other sounds and samples were included in the demo to demonstrate reasons (synths and pianos, guitars, drums, and drum loops). FX samples aren't contained in this pack)
