What is a frame slideshow?

A frame slideshow is a type of visual presentation that involves displaying a sequence of images or frames in a specific order, typically within a digital or physical frame or container. Frame slideshows are commonly used for various purposes, both in digital and physical formats, to showcase images or visual content in an organized and dynamic manner.

Frame slideshows are a versatile way to showcase visual content, tell a story, or create dynamic displays that capture viewers' attention. They are commonly used in various contexts, including digital photo frames, website image galleries, art exhibitions, presentations, and more. The choice of whether to use a digital or physical frame slideshow depends on the medium and purpose of the presentation.
