Serrvillasano – FilmVision Powergrade + LUT (Davinci Resolve):

All you need to create the authentic 16/35mm Film look. Film Emulation software includes DaVinci Resolve Powergrade as well as a LUT that's been matched to rec.709 footage making it easy to utilize with any camera footage which has been converted into rec.709. LUT is based on the particular Kodak Vision3 look found within the film "Sound of Metal" (2019). If you're who use a different program than Davinci Resolve takes a look at the LUT packs I have created.

Gfx plugin details of Serrvillasano – FilmVision Powergrade + LUT (Davinci Resolve)
