Unity asset - Easy Feedback Form v3.1.0: Easy Feedback simplifies bug reporting and player feedback in Unity games by seamlessly integrating it into your workflow. With just a tap of a button, detailed Feedback and bug reports are submitted directly from within the game. These reports are then conveniently organized and accessible through Trello, allowing you to address them efficiently. Easy Feedback is designed to be easy to set up and deploy, saving valuable development time and ensuring that player feedback reaches you promptly.

When a player submits a report, it is automatically categorized and directed to a designated list on your Trello board based on the type of Feedback. Each report includes essential metadata, such as screenshots captured when the feedback form is opened, system information, quality settings, and a log of messages, warnings, and exceptions. This information is formatted with markdown on Trello, making it easy to review and analyze while you focus on improving your game.

Key features of Easy Feedback include bug reports and Feedback sent directly to Trello, quick configuration to start receiving Feedback in under five minutes, automatic categorization and organization of reports, customizable report categories and tags, and detailed reports containing screenshots, Unity debug logs, system information, and more. The tool also supports multiple custom file attachments and offers extensive customization options, including a custom form element API and support for Unity's Input System.

Easy Feedback supports various platforms, including macOS, Windows, Linux, Android, iOS, WebGL, PlayStation, and Xbox, ensuring compatibility across various devices and environments. With Easy Feedback, you can streamline the feedback process, gather valuable insights from players, and easily improve your Unity game.
