Blender Market - Alt Tab Illumnia: Product Showcase Library:

AltTab Illumnia is a versatile preset collection for Blender, designed to streamline 3D scene creation for product visualization. It empowers artists to quickly and easily create professional renders with ready-to-use setups that are fully customizable and adaptable. Each scene is equipped with a pre-positioned camera and offers 40 color variations per setup, totaling 2,000 handcrafted color options.

By using Blender's asset browser, users can Drag & Drop presets directly into their scenes, accelerating their workflow and enhancing creative flexibility.

These presets serve as a robust foundation, letting users either finalize projects quickly or use them as the starting point for further customization.
