Archipelago – Quest 28 Descent Presets: Light can penetrate the water to reveal a sunken landscape deep under the sea and below the surface. In a world of mysterious cobalt, mystery, and midnight blues, Descent Sets offer siren music of mood and color, giving images a soft marine color featuring deep, sapphire-colored shadows and coral tones. Descent includes three distinct color presets and tools that allow you to be immersed in a subaquatic world through editing.

Adobe AI masks separate the subject from the background, soaking the background in blue shades while preserving the natural skin tones of your subject. The presets are free of grain as a default and include Grain Mask and Grain Mask O Presets that create or remove an ethereal grain masking layer, providing your photo with a subtle dusting of sand.
