Unity asset - COZY Stylized Weather 2 v2.4.1b:

Step into the realm of enchanting stylized weather with COZY: Weather, a comprehensive toolkit designed to infuse your game worlds with immersive atmospheric effects.

Compatibility with Various Render Pipelines: COZY seamlessly integrates with Unity's render pipelines, including the Built-in Render Pipeline, Universal Render Pipeline (URP), and High Definition Render Pipeline (HDRP), ensuring flexibility and optimal performance across different platforms.

Customizable Stylized Weather Patterns: Craft captivating weather phenomena, from dynamic time-of-day transitions to seasonal changes, using COZY's intuitive tools. Whether it's fluffy clouds or tempestuous storms, sunny skies or dense fog, COZY empowers you to tailor every aspect of your weather system to match your artistic vision.

Vibrant Rendering Features: Unlock a plethora of stylized rendering options, including:

- Stunning fog effects with distance-based color gradients.
- Dynamic atmosphere changes with a full time-of-day system.
- Nighttime ambiance enhancements like stars, auroras, and meteor showers.
- Customizable moon phases and orbit speed.
- Procedural cloud shaders with performance optimization.
- Calendar system with changing seasons and weather forecasts.

Complete Forecast System: Plan ahead and schedule weather events based on temperature and precipitation fluctuations throughout the year, giving players a glimpse into the future atmospheric conditions of your game world.

Out-of-the-Box Features: COZY comes with a wealth of pre-built assets and functionalities, including:

- Editor tools for quick scene setup.
- Easy creation of new profiles for particles.
- A variety of shaders, weather profiles, ambience profiles, and prefab models.
- Lightning system for stylized lightning strikes.
- Ambient manager for secondary atmospheric effects.
- Audio manager for seamless audio integration.
- Demo scene for immediate implementation.

Enhanced Gameplay Experience: Ensure a seamless gameplay experience with features like weather FX disabling indoors and zone-based weather, time, and ambience settings.

Embrace the magic of stylized weather in your game worlds with COZY: Weather, where creativity meets functionality.
