Control your comp by regulating layers that share attributes like Name, Type, Color, and much, much more!

It is easy to manage your composition by controlling layers that have the same attributes.

### Gfx plugin details of Aescript Taxon

The product is in the **After Effects Plugins** category from **AeScripts**, for more information about this post, you can click on the home page link in the sidebar.

To search for similar products to Aescript Taxon,

**Does this product work on Windows and Mac OS?** We mostly include the operating system in the title. If it is not written, it will work on Windows, and you can for the Mac version.

#### New Changes:

- New selection buttons
- Action buttons are showing even when "Default Action" is enabled
- Bug fix - "Name" selection works with the default action

#### This panel can be split into tabs that include:

- **Type:** Select layers by their nature (shape camera, shape or text, etc.)
- **Name:** Select layers by their names
- **Attributes:** Select Layers that have identical attributes (locked and visible, parent, etc.)
- **Label Color:** Select layers using their label
- **Blend Mode:** Layers are selected based on their blend mode
- **Custom:** Combining selectors of all tabs above in order to make custom tabs
