To search for similar products to Aescripts TextExploder,

Does this product work on Windowns and Mac Os? We mostly include the operating system in the title. if it is not written, it will work on Windows, and you can for the Mac version.

Divide Text Layers Readily

- divide into personalities
- divide into phrases
- divide into traces
- isolate one custom phrase
- strong and elastic custom divides with Regular Expressions

Accurate Placement

Following the separation, the standing of every letter is correctly maintained! However, **TextExploder** does not only"hide" letters in the text - you also receive really"blank" text layers that just contain the text that you see, without any expressions, text messaging animators, or additional suggestions.

- service for 3D layers
- service for bounded text (aka paragraph text or text box text)
- service for texts together with revived positions
- service for layers using"different dimensions" allowed
- KBar service - burst texts along with your preferred settings directly in the toolbar
- scripting API - utilize TextExploder Inside Your Ae scripts

New changes:

- fix issues with Unicode characters in custom split words
- fixed compatibility with newer OS versions and added support for time-limited licenses
