Dart PowerWEB Zoom for ASP.NET v1.0.5.5

2024-12-28 23:47:28

PowerWEB Zoom on ASP.NET can zoom images in excellent detail and smoothly zoom through hundreds of square pixels. Your website can be enhanced inefficiency by allowing your visitors to directly interact with images of products or large documents and images.

Until now, the display of high-resolution, interactive images within web applications was a matter of plugins or complicated scripting. With the PowerWEB Zoom feature for ASP.NET, the entire process is changing. The image control can perform functions such as zooming in on tiny images and moving across thousands of pixels. Drag, drop, and then run your app! Interactivity with images in applications such as Google Maps and Windows Live Local can be quickly accomplished without writing just one piece of code.

Dart PowerWEB Zoom for ASP.NET Great Features:

- Improve your user interface by adding extensive client functions - Improve the efficiency of your site by letting visitors directly interact with the images of your products, more important documents, large documents, as well as photos.
- Profit by your previous ASP.NET development skills - A full server-side object model and a client script API come with full ASP.NET quick support for application development.
- Include interactive in-line functionality on your site's images. The users can now selectively interact with high-res images and other content instead of switching between different pages and pop-ups.
- High-resolution image viewing experience with only minimum browser requirements. No extensions, Flash, Java, or ActiveX controls are required.
- Utilize high-resolution, full-resolution images. Configurable dynamic rendering lets you make use of quality original images...no required to create thumbnails or make low-resolution copies.
- Display high-resolution images fast and efficiently. On-demand delivery of images lets you instantly view images without lengthy downloads.
- You can be up and running in a matter of minutes - Zoom and image pan functionality can be added without writing just one piece of code.
