CinemaGrade v1 1 15 CE (WIN): Cinema Grade is a new color grading program designed from the ground up that is a plugin inside Premiere Pro, DaVinci Resolve. It is a powerful tool for color grading. Cinema Grade color grading at once is made more accessible and more efficient through direct color grading on screen, a professionally-trained colorist workflow, and more than 90 built-in Hollywood-look color effects that show real-time previews of your most loved LUTs.

Bad looking like a video...

After all the effort and effort put into making your video appear professional, you start the color-grading process only to discover that the tools built into the software are complicated and confusing, and the final product isn't what you had envisioned. It's uploaded hoping it gets noticed, but the massive views don't show up, and neither do the calls back.

How to change the gradation of light and color of images?

You can edit images using "CinemaGrade".

Where can I download the product?

After subscription, You can download it for free from here.

Point-and-click grading

Modern software for color grading allows you to make color grade changes with just a click within the viewer. Color adjustments are as simple and intuitive as sketching or painting. Take a look inside the cinema. Premiere Pro, DaVinci Resolve, and Final Cut Pro X.

Grade 3X speedier

You will be guided through everything, from fixing photos to making several photos together and applying the final to your photos.

You can get the Hollywood look.

Pick from more than 90 looks and emulations of films that are based on Hollywood films. You can also view real-time previews of your LUTs. Find the missing features from solutions that were created 20 years ago. Easy for beginners but powerful for the experts, The Cinema Grade plugin enables content creators to spend less time using clunky controls and more time producing animated videos.

Click and grade the viewer.

Perform changes and repairs directly in the browser with the industry's most simple point-and-click grader. You can change the color of your screen according to where you click.

Big budget workflow

Complete projects three times quicker and get superior outcomes using Hollywood's grading method. No other program offers the exact step-by-step process that will guide you from beginning to end.

False color mode
