What is Fuji Original Lightroom Mobile Profiles?

Fujifilm's cameras are known for their unique film simulations, such as Classic Chrome, Provia, Velvia, and Astia, among others. These film simulations replicate the look and feel of traditional Fujifilm film stocks and have gained a following among photographers for their distinct color profiles.

Adobe Lightroom and Lightroom Mobile allow users to apply profiles that emulate these Fujifilm film simulations to their digital photos. These profiles can help photographers achieve a specific look or style in their images, reminiscent of the classic Fujifilm film stocks.
