It includes animated characters and motion elements, business icons lower-thirds, as well as any other items you require to create great video content.

You can make one piece of content for all media.

The content you upload will be produced by the system automatically and will be presented in three layouts:

- TV screen aspect (4k)
- Square
- Vertical (Story size)

HOW to use:

The first step is to easily modify any of the compositions already created After that, various outputs for different media will be automatically created.

Set up hundreds of useful 4K elements by using the full After Effects extension.

We will provide you with everything you need to develop content using this package. Characters can be used to play the role of mascots in your social media or websites.

Customized color characters and components can help you create outstanding content for your company's brand.

The package includes the ability to modify Mogrt files that can be used for Adobe Premiere projects.
