Blender Market – Hand-Drawn Line Generator v2.8: Introducing the 'Hand-Drawn Line Generator' addon, an enhancement built upon Freestyle, simplifying changing line styles with ease and efficiency.

Applications:

- The 'Hand-Drawn Line Generator' is ideal for various 3D art fields, including animation, character design, architectural visualization, and more.
- One-Click Generation: Initiate the rendering process with a single click and watch as hand-drawn lines appear upon completion.
- Style Selection: Choose three unique styles to impart a distinct artistic atmosphere to your work.
- Line Thickness Adjustment: Easily adjust the thickness of the lines to suit your design requirements.
- Line Color Adjustment: Select the perfect color to enhance the visual impact of your artwork.
- Marking Display Areas: Highlight specific areas by manually displaying hand-drawn lines where needed.
- Separating and Merging 3D Layers: Exercise precise control over your work by separating and merging 3D layers as necessary.
- User-friendly Interface: Enjoy an intuitive interface with clear instructions, available in Traditional Chinese and English for effortless navigation.
