- Smart Adjustments: Experience more consistent adjustments in batches of images with the help of Smart Adjustments using AI. It identifies similar images and applies White Balance (WB) and Exposure adjustments for a unified look.
- Faster Culling: Capture One introduces significant improvements to the culling process: Rate and color-tag images directly in the importer. Implement an automatic group view for accelerated image culling. Introduce a dedicated cull view mode for imported images, offering seamless browsing with zero delay.
- Layers in Styles: Enhance your editing capabilities by including layers in styles, providing a more versatile and efficient workflow.
- Change Capture Time: Enjoy the flexibility to change the capture time, allowing for better organization and synchronization of images.
- Variants in Albums: Organize and manage your images more effectively by incorporating variants within albums, providing a structured and accessible approach to your projects.
- Reviewer Management in Live: Simplify collaboration and feedback processes with enhanced reviewer management features during live sessions.
- Auto Dust Removal: Introducing the Auto Dust Removal tool, allowing you to remove sensor dust with a single click effortlessly. Adjust results manually or view removed dust by clicking the circle icon. The tool, accessible via the default shortcut Option/Alt + O, is currently in BETA with ongoing algorithm improvements.
- Face Focus in Cull & Importer: The Image Importer and Cull mode now feature Face Focus, offering close-ups of faces or eyes for improved focus evaluation. With five zoom levels, including Limit to Eye and Limit to Face, assessing focus quality is more efficient.
- Styles & 'Edit With...' Shortcuts: Fulfilling along-awaited requests, users can now set custom shortcuts for styles and the 'Edit With...' feature, providing quick access and improved workflow efficiency.
- Wireless Tethering for Fujifilm Cameras: Fujifilm camera owners can now enjoy wireless tethering to Capture One. Supported models include Fujifilm X-T5, X-H2, and X-H2s. Tethering is also possible through a network cable using the Fujifilm FT-HX grip.
- Other Improvements: Faster preview generation for RAWs and DNGs, enhancing tethering performance. Integration with Frame.io (Mac only) enables users to link their Frame.io account to Capture One, facilitating image imports and directly publishing edited photos from the software.
