- Phone, Tablet, smartwatch, laptop, desktop
- Easy color controls
- 250 animated icons
- After Effects CS6 and above
- Universalist Controller
- Video Tutorial
- No plugins required

What is Flat Outline Web App Mock-Up?

A Flat Outline Web App Mock-Up is a design representation of a web application's user interface that follows the principles of flat design and minimalism. It aims to provide a simplified and clean visual overview of the web app's layout and structure without the use of complex or three-dimensional elements.

These mock-ups are often used as a starting point in the design process to plan the layout and user interface of a web application. They help in visualizing the structure and placement of various elements, such as buttons, navigation menus, content areas, and icons, in a straightforward and uncluttered manner. They can serve as a basis for further design and development work, providing a clear blueprint for the final web application's user interface.
