THE NEW TRAILER SOUND FX GOLD STANDARD

CINEMATIC TRAILERS DESIGNED 2 is here to establish new standards Concerning trailer audio effects and production components. Each and each and every sound can be thought of as a masterpiece that's been meticulously crafted by our BOOM Library audio designers throughout a long and quite crucial selection procedure. The aim was to make a professional audio set that's quite simple to use, provides the ideal effect immediately, and contains a balanced number of"punch" to glow through the rest of the trailer audio sources (audio, voice-over, etc.). As a drawback, it is going to put a grin on your face when listening to a BOOM-Library-spiced project.

CINEMATIC TRAILERS DESIGNED 2 provides you with over 120 documents -- a huge variety of over 450 different high-quality WHOOSHES, HITS, CRACKS, BOUNCES, SLAMS, TRANSITIONS, RISES, DROPS -- essentially all you want to instantly draw attention to your picture, trailer, teaser, demonstration, podcast or advertising video.

CINEMATIC TRAILERS DESIGNED two STEREO

UNMATCHED QUALITY FOR THE MAXIMUM EFFECT

Whether is noise just noise and at what stage does it become an actual BOOM Library audio effect? The ability is to thoroughly design it in a way that conveys the impact of this noise to its listeners. Just then they will truly feel the effect of the noise and you'll have the ability to blow your audience away out of their comfy seats.

EASE OF USE

employing those sounds could not be simpler. Simply drag and drop the engineered SFX in your private project, get mind-blowing results immediately, and, in addition to this, a large, satisfied smile on your face.

WHAT WE RECORDED

The origin sounds for this library were other BOOM Library Construction Kits that we've ever made. Our designers picked their favorite sounds and layered, processed, and made them always in mind to make a sound effect that surpasses everything they've ever heard.

WHAT'S SO SPECIAL ABOUT THIS LIBRARY?

CINEMATIC TRAILERS DESIGNED two is here in order to establish new standards concerning trailer audio effects and production components. Each and each and every sound can be thought of as a masterpiece that's been meticulously crafted by our BOOM Library audio designers throughout a long and quite crucial selection procedure. The aim was to make a professional audio set that's quite simple to use, provides the ideal effect immediately, and contains a balanced number of"punch" to glow through the rest of the trailer audio sources (audio, voice-over, etc.). As a drawback, it is going to put a grin
