

## Billboard In Night City for After Effects (Videohive 56323304) - AE Project

2025-02-10 17:09:13 [label](#) [我要反馈](#) [下载页面](#)

**Billboard In Night City** is a glitzy city that makes it eye-catching to the viewer because it can be used as a futuristic After Effects template. This template includes two versions of the scene and showcases your media. It is perfect for socials, advertisements and intros and features easy customization like font links, logo additions, and complete colour control. It is ideal for people wanting to go the easy route while creating a high-tech visual experience.

- Select from two versions of the cityscape that best fit your project needs.
- Adjust the environment, lights, and colours of the billboards to the desired theme of your choice.
- Set the template font and integrate the sample text with other fonts.
- Add media and logos, and adjust features to the template for it to indeed be yours.
