LUTS   平面设计

- **POWERFUL SATURATION -** Inspiring themselves with the revolutionary 3-Strip Technicolor technology, These LUTs display vivid, saturated colors and distinctive tonal characteristics associated with motion picture cinema from the beginning.
- **3-STRIP PROCESS -** Each LUT effectively divides the image into three channels (RGB), transforms them into Cyan, Magenta, and Yellow, and then combines them again, essentially simulating the analog 3-strip process.
- **MOOD & TONE -** Great for period films and genre films. It's also great for any other film that requires a dash of classic Hollywood glamour.

How to use Strip Technicolor on your images in Luts?

You can use "CINECOLOR – 3-Strip LUTs".

Where can I download the product?

After subscription, You can download it for free from here.
